CBM™ 2040 DUAL DRIVE FLOPPY DISK

The CBM 2040 Dual Drive Floppy Disk is an intelligent storage peripheral that supplements your computer's memory. A portable and reliable drive, the CBM 2040 can store up to 340K bytes of information. It uses industry-standard 5¼" floppy diskettes. Built-in microprocessor-controlled software provides capabilities such as sequential file manipulation and automatic directory search.

HARDWARE SPECIFICATIONS

Dual drives
Two microprocessors
170K bytes storage per 5¼" diskette (single side)
Tracks 35
Sectors 17-21 per track
Blocks 664
IEEE-488 interface
LED error indicator
Drive activity indicator lights
Disk Operating System Firmware (12K ROM)
Disk Buffer (4K RAM)

FIRMWARE

Disk operating System version DOS 2.0
Sequential file manipulation
Program load and save
Error recovery
Automatic directory search
Command parser for syntax validation
Sequential user files

POWER REQUIREMENTS

Volts: 110V
Cycles: 60 Hz
Watts: 60

BASIC COMMANDS

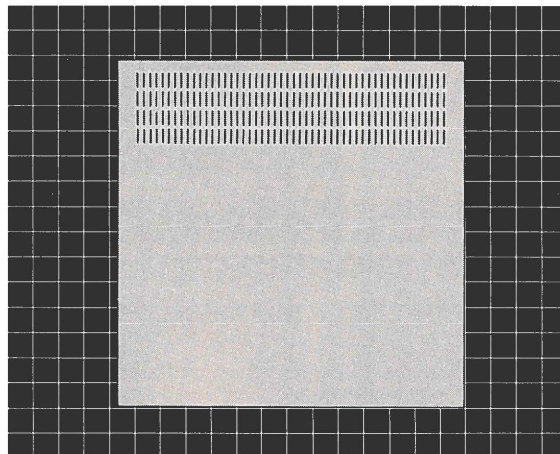

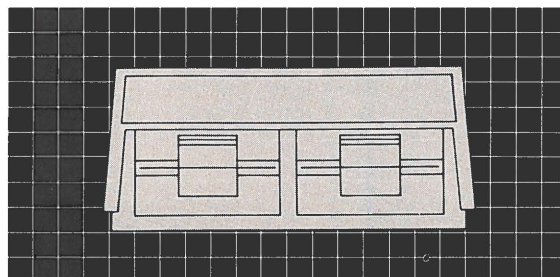

Command	Description
CLOSE	Concludes I/O to a channel.
COLLECT	Frees up space allocated to improperly closed files on disk and deletes their references from the directory.
COPY	Makes a copy of a file within a disk unit.
DIRECTORY	Sends the disk directory to the computer.
GET	Reads a character from a file into a variable.
HEADER	Formats a blank disk or clears an old disk.
INPUT #	Reads items from a sequential or random disk file and assigns them to program variables.
LOAD	Sends a file to the computer from external storage into memory.
PRINT	Outputs data to the screen or a specified channel.
SAVE	Saves a BASIC program file on external storage.
SCRATCH	Deletes a disk file.
