

*Specialized skills of Dynalogic's technical personnel are amplified by an aggressive global marketing program*

## COMPANY PROFILE

With over nine years of proven experience in micro-processor floppy diskette and Winchester disk technology, Dynalogic, a Bytec Management Company, takes its place among world leaders. State of the art advancements have been made possible by a strong commitment to research and development supported by a solid financial base.

Major clients around the world are served from Dynalogic's locations in the United States, England, West Germany, Hong Kong and Canada.

An inhouse team of engineers, writers, marketing and sales staff, senior managers and financial planners, as well as rapidly growing production staff, allows us to respond quickly to changes in the marketplace. A reputation for reliability and quality control has secured international clients who regard Dynalogic as a responsible manufacturer, supplier and innovator.

Litton Industries, Bosch Corporation of Germany, CNCP Telecommunications, Monroe and Calcomp all testify to the success of Dynalogic.

DYNALOGIC  
A Bytec Company

### Software

- Microsoft Advanced MS-DOS
- Microsoft Advanced Disk BASIC with graphics support (same as IBM PC)

### Processor and Memory

- Intel 8088 16-bit processor
- 256K user RAM with parity

### Diskette Drives

- One 5 1/4" double density dual sided diskette (327K)

### Keyboard

- Detached low profile keyboard that stores in main unit when not in use

### Display Systems

- 7" non-glare amber CRT
- 25 line by 80 column display with 6x7 matrix characters
- Automatic CRT shutoff to prolong life

### Serial I/O Port

- RS232C and RS423 compatible

### Parallel Printer Port

- IBM (tm) PC and Epson printer compatible

### Other features

- Time and date clock with permanent battery back-up
- Programmable sound system
- Composite video output for external video monitor
- Expansion connector for future growth

### Optional Hyperion Hardware

- Intel 8087 floating point processor
- Second 5 1/4" double density dual sided diskette drive (327K)
- Internal 300 baud modem with auto-dialer/auto-answer capability direct connect or acoustic cups
- Attractive travelling case

### Optional Hyperion Software

- Microsoft MULTIPLAN electronic spreadsheet
- IN:SCRIBE executive text editor
- IN:TOUCH communications management system
- Wide range of IBM (tm) PC software

### (tm) Trademarks

Hyperion, IN:SCRIBE & IN:TOUCH are trademarks of Dynalogic. IBM is a trademark of International Business Machines Corporation. MS-DOS, MULTIPLAN & Microsoft are trademarks of Microsoft Corporation. VISICALC is a trademark of Visicorp. WORDSTAR is a trademark of Micropro. DBASE II is a trademark of Ashton Tate. Dynalogic is a Bytec Management Company.

answer to the  
information  
and communi-  
cations needs of  
today's  
professional*

## IBM Compatibility

Hyperion runs all the popular programs the IBM (tm) Personal Computer. Eg: Visicalc, Wordstar, DBASE II, Advanced

## What if Financial Modelling

With Hyperion, complex statistical analysis and casting are easy, fast, and accurate.

## Editing Messages or Reports

Hyperion always displays text on the screen as it will look when printed. With menu selection there are no commands to memorize.

## Communicating with the World

Hyperion will log on to any computer service or receive current information. It will also make long distance calls. It stores all the telephone numbers you need. All at the touch of a button!

## Portability

Hyperion is fully portable. Move it around the office or take it around the world in its handsome travelling case.

## Explain

Hyperion explains how it operates so use is easy.

Dial telephone numbers, or 'log on' to data services...AT THE TOUCH OF A BUTTON

## IN:TOUCH Communicating With the World

Hyperion's IN:TOUCH is used to communicate with other computers and data services. It will automatically dial and allows you to send and receive. The ideal 'electronic mail' terminal.

Hyperion also stores and manages your own personal telephone directory, and dials at the touch of a button. The built-in loudspeakers make the call as it is dialed.

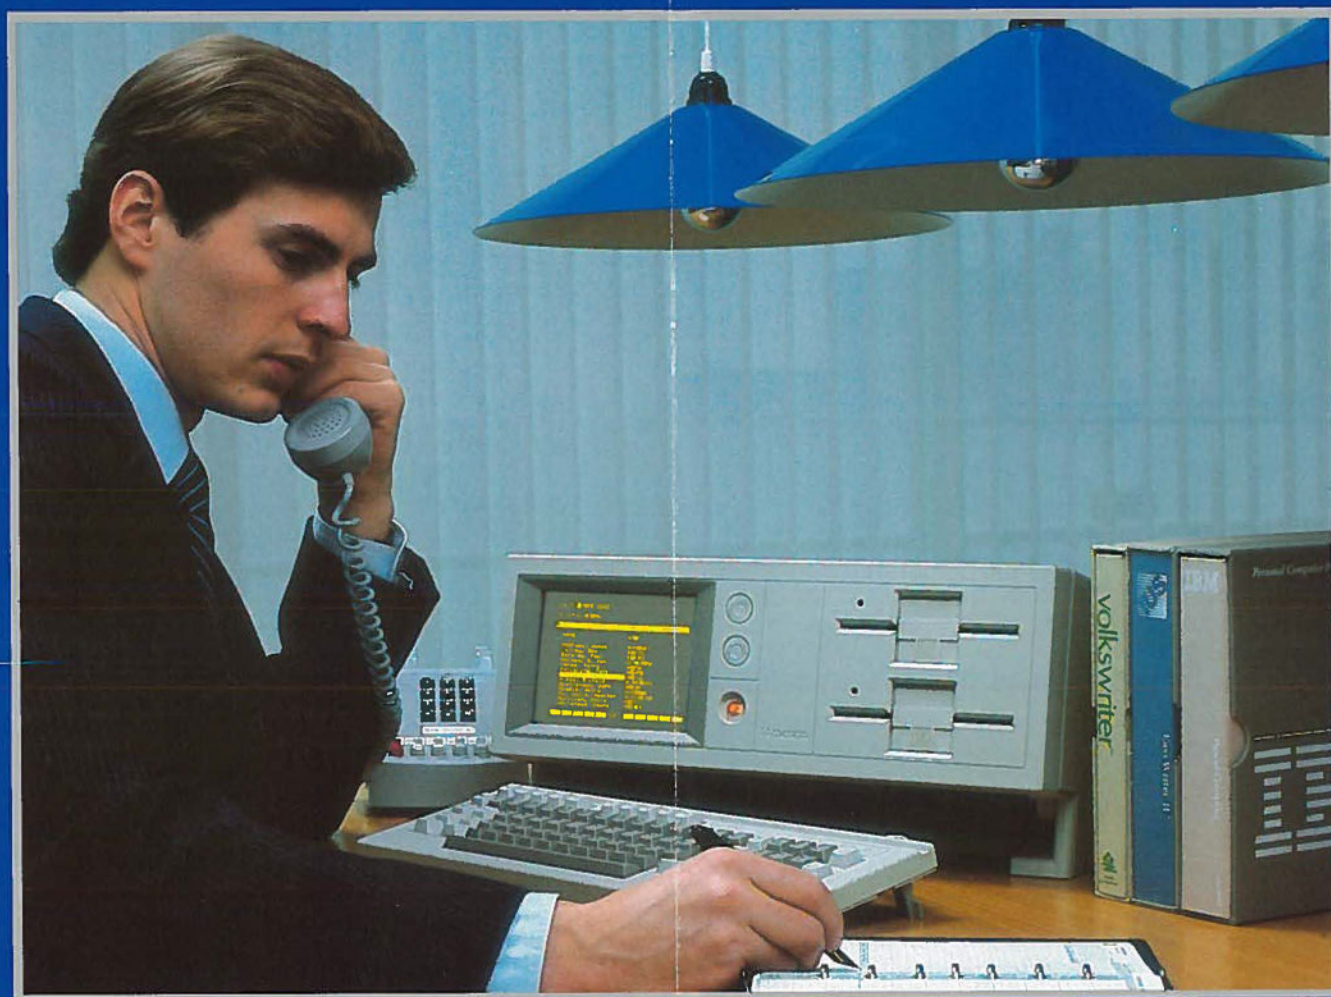

## PORTABILITY

A true companion, Hyperion weighs in at 10 pounds. Portability within the office is built in carrying handle. For longer trips, a carrying case is available. Packed in a carrying case, it fits under a commercial airline seat. Hyperion. A professional performer with

## EXPLAIN

Hyperion is designed to prompt you, explain, and minimize tutor time. After all, you can't remember everything

Hyperion saves valuable desk-top space with one of the smallest 'foot-prints' in the industry.

## IBM COMPATIBILITY

To take advantage of the world's fastest growing micro-computer software base, Hyperion uses the same industry standard 16 bit MS-DOS operating system as the IBM (tm) Personal Computer (PC). It can read and write IBM (tm) PC diskettes, and communicates using the same data exchange protocols. All of the special keyboard features available on the IBM PC are also provided on the Hyperion.

## MULTIPLAN What if Financial Modelling

An aid for both business and personal needs, Hyperion's Multiplan (tm) is the most powerful financial modelling and planning tool. The design of Multiplan allows beginners to work intuitively. Help on any function can be accessed at the touch of a button. With little experience, users can very quickly and efficiently accomplish a wide variety of tasks. The 'bottom line' effect of any change can be viewed at once. Multiplan was voted *Product of the Year* by Infoworld.

## IN:SCRIBE Editing Messages and Reports

Hyperion's IN:SCRIBE (tm) redefines micro-computer text editing. This is not a complex word processing program, but a productive tool for the busy professional. Reports and memos can be quickly entered and modified, using a menu-like set of function keys. For example, entire portions of text can be quickly moved to different parts of a document.

Move it around the office or take it around the world in its handsome protective travelling case
