# CBM™ 2022 TRACTOR PRINTER

The CBM 2022 Tractor Printer enhances your CBM business system by enabling you to print mailing lists, checks, invoices, and standard or customized business forms. Besides printing alphabetic and numeric characters, the CBM 2022 printer provides a full font of Commodore's extensive graphic characters. All characters can appear both in normal (black on white) and in reverse (white on black) for added emphasis. Horizontal enhancement enlarges character sizes for titles and headings. The CBM 2022 is programmable to provide you with custom line spacing, margins, and page lengths. The built-in software offers automatic line counting, error diagnostics, and automatic print head protection to extend the life of the print mechanism.
