

WordPro 3-Plus

Word Processing Software Program

Turns your Commodore CBM™ 32K computer into a highly sophisticated, versatile word processor loaded with the same inventory of features found in other professional word processing systems costing thousands of dollars more.

Recommended For Use With:

- Commodore CBM 32K (minimum) Computer with 40 column display.
- Commodore CBM 2040/4040/8050 Dual Drive Floppy Disks.
- NEC Spinwriter, Commodore CBM 2022 or 2023 Printer, or any properly interfaced ASCII printer.

User Advantages:

WordPro 3-Plus™ offers an exceptional text editing, document storage, and typewriter quality printing capability to any business whose needs would benefit from the increased productivity inherent to word processing. It includes nearly every entering, editing, memory, and printing feature considered important to sophisticated word processing. Compared with other available systems, many of which cost up to twice as much as the system that WordPro 3-Plus creates, it is unusually easy to learn, and just as easy to operate.

™WordPro 3-Plus is a trademark of Professional Software and Pro-Micro Software Ltd.
CBM and PET are trademarks of Commodore Business Machines
