

Effective date: August 1984

NOTE: This list is made up of software packages that BYTEC has tested on the Hyperion. Note that BYTEC does not endorse any of the software for any purpose. They only imply that these packages work the same on the Hyperion as they do on the IBM PC (equally as well or equally as poorly). It is recommended that before buying a program, you subject it to a rigorous test of your particular application.

This is the final list published by COMTERM prior to the discontinuing the manufacture of the Hyperion.

Under the column OS (for Operating System), an "A" indicates that a system using IO.SYS 1.01H or lower is required. A "B" indicates that a system using IO.SYS 1.02 C or higher is required. Both require MSDOS.SYS 1.25H. These version numbers are displayed when DOS is first booted. A "C" indicates that special startup procedures are required. It is suggested that if you are interested in the package with a "C", talk to members at the next HUGO meeting, or contact COMTERM support in Montreal.

PROGRAM	VERSION	ORIGINATOR	OS
25th Hour 25:01	1.0	Softrend	A,B,C
25th Hour 25:02	1.0	Softrend	A,B,C
25th Hour 25:03	1.0	Softrend	A,B,C
1 Point Graphics	Pre	International Micro	B
3087 Package	2.22/2.24	Seattle Computer Prod	B
