Memo

Date: January 30, 1995

Subject: Corrections to The Journey Inside Teacher's Guide

From: Intel Digital Education and Arts Program

To: Owners of "The Journey Inside: The Computer" Kit

We hope you are using your kit and finding it a useful tool for your classroom. One educator did cover a mistake in the transistor section of the teacher's guide. This correction has been made in later printings, but for those of you who received one of the first 5000 kits we have enclosed the corrected pages for your guide. Simply pull the corresponding pages from your current guide and replace them with the corrected pages. Please accept our apology for this inconvenience.
