and hardware information

A joint publication of Intel Corporation and the
International Society for Technology in Education (ISTE)

The Journey Inside spring 1998 Newsletter is
available online at: www.intel.com/intel/educate

The articles for the spring edition include:

New interactive web site—How Chips are Made: Intel's newest web site is an interactive presentation *How Chips are Made*. This information will answer many of the questions you may have about the fabrication of chips.

Questions & Answers: This issue includes discussions about EUV, a new photolithography process, restoring CD surfaces, degaussing monitors, and finding SCSI-2 cables.

One Digital Day—Book Review: Intel sponsored a book *One Digital Day* that involved the efforts of 100 of the world's top photojournalists all working to capture events of July 11, 1997.

Magazine Reviews: In January 1998 *Scientific American* produced an issue devoted to solid-state technology and in February 1998 *Newsweek* released one looking at the power of inventions.

Intel Selected to Sponsor Science Talent Search: Learn the details about the ongoing Science Talent Search contest for high school students.
